CuraPro Brain can help you preserve your most precious asset—your mental agility, focus, and clarity. With an intelligent combination of ingredients, CuraPro Brain enhances your ability to think clearly and effectively, and supports healthy mental function for years to come.*

Why CuraPro Brain? The Advantages are Clear!

- Mental agility
- Focus and clarity
- Neural communication
- Healthy brain function
- Protection from damaging oxidative stress*

CuraPro Brain provides the key nutrients you need to support clear thinking:

- **BCM-95® Curcumin** is a clinically studied ingredient extracted from turmeric that supports cognitive health, mental agility, and protects your brain from the risks of oxidative damage. It also provides turmeric essential oil with turmerones for better absorption and greater benefits.*
- **Vitamin D3** supports clear thinking and focus. Higher blood levels of vitamin D are associated with healthy brain function.*
- **Rosemary** and **Sage** support healthy brain enzyme activity, which in turn supports focus and clarity.*

Frequently Asked Questions for CuraPro® Brain:

Q. Can CuraPro Brain be used at any age?

A. Absolutely. **CuraPro Brain** is useful for adults of any age.

Q. How does the BCM-95® Curcumin in CuraPro Brain compare to other curcumin and turmeric products?

A. The proper product comparison is curcumin to curcumin. However, since many companies are comparing their curcumin absorption to turmeric, we provide this information as a service to our customers.

- Plain curcumin delivers up to 50 times more curcumin as the same amount of turmeric.
- BCM-95® Curcumin has been proven to deliver up to 10 times more curcumin into the bloodstream as the same amount of plain curcumin.
- Therefore, when compared **gram per gram**, BCM-95® Curcumin delivers up to 10 times more curcumin than plain curcumin 95% and up to *500 times more curcumin* than found in an equal amount of turmeric.

Q. Why vitamin D3 and not vitamin D2 in this supplement? Does the form matter?

A. The form of vitamin D does matter. Because vitamin D3 is the form that our bodies synthesize, it typically shows much better use than vitamin D2, which ultimately needs to be converted to the D3 form. We use vitamin D3 in **CuraPro Brain** because it doesn't require this extra step.

Q. Why use oils rather than dry extracts for the rosemary and sage?

A. Plant oils are many times more concentrated than dry extracts of the same botanicals. While not every herb can be successfully used as a concentrated oil in a supplement, rosemary and sage both work very well in this form.

What to pair with CuraPro® Brain:

- **Clinical OPC®** – Provides clinically proven high absorption, tannin-free French grape seed extract.*
- **EurOmega-3®** – Provides omega-3s from salmon, bound to beneficial phospholipids *plus* brain-friendly peptides, making it a perfect choice for once-daily cognitive support.*
