Fibroxia™ is uniquely formulated with ingredients that address occasional pain and fatigue.*† There is no other supplement that brings together clinically studied curcumin and boswellia combined with turmeric essential oil and frankincense oil that works quite like Fibroxia™.

Relief at Last

Fibroxia addresses the physical and energy depleting aspects of pain with a unique combination of clinical strength botanical ingredients.*†

Fibroxia gets to the source of muscle pain, fatigue, and nerve function for the ultimate support your customers have been searching for. Used daily, they'll enjoy healthy energy, mobility, and peace of mind for the vibrant life they'll love.*

- **Healthy nerve activity**
- **Occasional muscle pain†**
- **Mental well-being and focus**
- **Daily energy***

The Right Formula

The botanicals in **Fibroxia** are the best available. They are specifically selected to relieve occasional muscle pain, support daily energy, and maintain healthy nerve activity.*†

- **BosPure® Boswellia:** Uniquely standardized for beneficial levels of key compounds, including AKBA (acetyl-11-keto-B-boswellic acid), and purified to remove compounds that interfere with health benefits, this boswellia is specifically shown to work synergistically with curcumin for even more intensified benefits.*
- **BCM-95® Curcumin:** Backed by 30 published studies, and known for multiple benefits, including support of focus, mobility, and pain relief.*† Its abilities are enhanced by boswellia, helping this compound from turmeric work even more effectively to relieve occasional muscle pain and fatigue.*†
- **Turmeric Essential Oil:** Increasingly studied for its ability to boost curcumin's absorption and activity after absorption, as well as providing unique health benefits, turmeric essential oil supplies powerful turmerones to support healthy nerves and muscles.*
- **Frankincense Oil:** Used traditionally for centuries and now a focus area of modern research, frankincense oil supplies compounds that support cellular health and mental well-being.*

Though powerful on their own, these ingredients are carefully blended in the right ratio to work together for enhanced strength.*

Frequently Asked Questions for Fibroxia™:

Q. What makes BosPure® Boswellia different from other boswellia supplements?

A. Boswellia has a number of beneficial compounds, AKBA (acetyl-11-keto-beta-boswellic acid) being one of them. In fact, it supports pathways in the body that even other strong botanicals can't match. However, unstandardized boswellia can also contain beta-boswellic acid, which is not associated with optimal benefits and can interfere with boswellia's health promoting activities.* BosPure is uniquely standardized to ensure at least 10% AKBA, and virtually no pro-inflammatory beta-boswellic acid.

Q. What is the difference between turmeric, curcumin, and BCM-95® Curcumin?

A. Turmeric is the plant that provides curcumin. Typically, turmeric contains about 2 to 5 percent curcumin, so taking an unstandardized, powdered turmeric product means that very large amounts would be required to get even a small amount of curcumin.

Additionally, standard curcumin extracts are poorly absorbed from the gastrointestinal tract. That's why BCM-95 blends high-quality curcumin with turmeric essential oil in a patented process to significantly enhance absorption. The turmeric oil yields beneficial turmerones not found in other curcumin products. Turmerones also yield benefits similar to curcumin, which is why they have been increasingly studied for a variety of health benefits.*

The clinically studied curcumin used in **Fibroxia** (and other EuroMedica® formulas) is the most clinically studied, enhanced absorption curcumin in the world with 31 published studies, 14 of which are human clinical trials.

What to pair with Fibroxia™:

- **Traumaplant® Comfrey Cream** – Topical cream with choline, rosmarinic acid and allantoin for outstanding care.*
