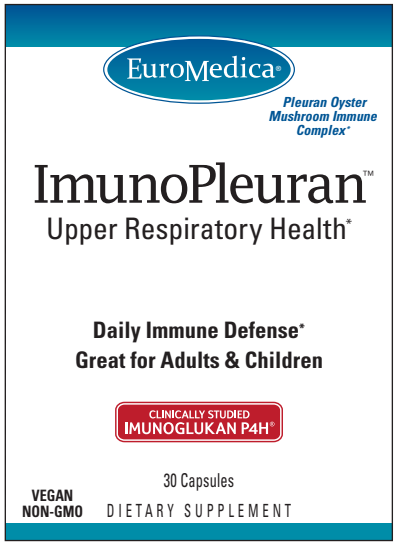
ImunoPleuran™

Upper Respiratory Health*



SUPPLEMENT FACTS

Serving Size: 1 Capsule
Servings Per Container: 30

Amount Per 1 Capsule (Veg):		%DV
Vitamin C (as ascorbic acid)	100 mg	111%†
Imunoglukan P4H® active polysaccharide complex providing Beta-1,3/1,6-D-Glucan Pleuran isolated from Oyster Mushroom (*Pleurotus ostreatus*)	100 mg	**

**Daily Value (DV) not established.
†Percent Daily Values (DV) are based on a 2,000 calorie diet.

Other Ingredients: microcrystalline cellulose, hydroxypropyl methylcellulose (vegetable cellulose capsules), vegetable source magnesium stearate, silica.

No sugar, salt, yeast, wheat, gluten, soy, dairy products, artificial coloring, artificial flavoring, or artificial preservatives.

Recommendations:
Adults: 1 capsule daily. May increase to 1 capsule twice daily. **Children (4 years and older):** 1 capsule daily.

Take in morning on an empty stomach.

Consult a healthcare practitioner prior to use if you are pregnant, nursing, or undergoing immunosuppressive treatment. Do not use if you have had an organ transplant.

Imunoglukan P4H® is a registered trademark of Pleuran, s.r.o. Bratislava, Slovakia.

Clinically Studied and Validated
This is the first time that the clinically studied and validated oyster mushroom pleuran is available in the United States. This oyster mushroom pleuran has 25 years of research and 40 published studies.*

Health Benefits:
- For ages 4 & up
- Promotes natural resistance
- Supports upper respiratory function*
- Clinically studied Imunoglukan P4H®
- Sourced from oyster mushroom
- Includes synergistic vitamin C

What Makes Our Product Unique:
- Concentrated source of bioactive pleuran for outstanding immune support*
- Backed by multiple clinical studies & real-world validation
- Safe and effective for ages 4 & up
- Powerful & proven mushroom defense*

VEGAN | NON GMO | LAB TESTED FOR PURITY & QUALITY

Frequently Asked Questions for ImunoPleuran™

Q. Will ImunoPleuran Upper Respiratory Health supplements still work if you take them with food?*

A. ImunoPleuran and ImunoPleuran Extra Strength should be taken ***without food***, on an empty stomach. Pleuran supports your natural defenses by interacting with receptors on the surface of immune-activating Peyer's patches in the small intestine. This works best when there is no digestion occurring at the same time.*

Q. Will this upset my stomach?

A. It is not likely. While everyone responds differently to supplements, clinical studies–even in children–show that the pleuran in ImunoPleuran is incredibly well tolerated and highly rated by participants in those studies.

Q. How is pleuran different from other beta glucans?

A. Pleuran is a beta glucan unique to oyster mushrooms (*Pleurotus ostreatus*). Unlike beta glucans from other sources, the insoluble structure of pleuran means that it is not absorbed, but rather passes through the digestive system intact, and is recognized by receptors on immune cells in the small intestine called Peyer's patches.*

Q. Is this gluten free?

A. Yes.

Q. How is pleuran obtained from oyster mushrooms?

A. Every mushroom is hand-harvested, with the stems separated from the caps. The caps are sent to restaurants, so nothing is wasted. Meanwhile, the stems are kept cold to inhibit an enzyme called beta glucanase from breaking down and weakening the mushroom's beneficial pleuran. Within 26 hours of harvest, the stems are washed, processed, and dehydrated (without the use of toxic solvents) to isolate and concentrate the beneficial pleuran.

Q. Why launch mushroom supplements? What is so unique about this particular mushroom?

A. Our founder and president, Terry Lemerond has been investigating the health-supporting properties of mushrooms for some time. However, this particular oyster mushroom pleuran impressed him the most. First, 25 years of research, 40 clinical studies with children and adults, and 25 years of use around the world to back it up. Secondly, pleuran is unique to oyster mushrooms, and provides a safe and effective immune support option for children and adults.* Third, Terry found pleuran to be incredibly effective for his own use while traveling in Europe and wanted to share this discovery with people in the United States. Because we know that these mushroom supplements will deliver results, we chose to make ImunoPleuran and ImunoPleuran Extra Strength our first mushroom products.

Q. What is the difference between ImunoPleuran and ImunoPleuran Extra Strength?

A. While both formulas feature clinically studied pleuran, each supplement is distinct. ImunoPleuran provides 100 mg of pleuran per capsule plus 100 mg of vitamin C and can be taken daily by adults or children as young as four years of age.* By contrast, ImunoPleuran Extra Strength features 300 mg of pleuran per capsule, plus 160 mg of vitamin C and 10 mg of zinc. It is recommended for adults and for acute immune support for a duration of five days.*

What to Pair with ImunoPleuran™

BosPro™	Delivers uniquely standardized boswellia that concentrates beneficial AKBA to support the respiratory system without causing drowsiness or jitters.*
Thyme *plus* Oregano	Delivers concentrated oregano and thyme oils for safe, strong, and effective immune support and healthy bacterial balance.*
