

Thyroid Care™*

Supports Thyroid, Immune and Complete Metabolic Function*

Thyroid Care™ provides superior nutritional support for healthy thyroid and immune function. Optimal levels of iodine benefit the thyroid gland and enhance metabolism. L-tyrosine is an important amino acid which is absolutely necessary for the body to support healthy thyroid (as well as noradrenaline and dopamine) hormone production. It is impossible to have a well functioning thyroid without sufficient quantities of tyrosine combined with iodine, either in the diet, or through supplementation.*

Recommendations: 1-2 capsules daily on an empty stomach, or as recommended by your healthcare practitioner.

Do not use if trying to conceive, pregnant, or nursing.

Supports Thyroid, Immune and Complete Metabolic Function*

Iodine with L-tyrosine

60 Capsules

 **NON-GMO** DIETARY SUPPLEMENT

SUPPLEMENT FACTS

Serving Size: 2 Capsules
Servings Per Container: 30

Amount Per 2 Capsules (Veg):	%DV
Iodine 30,000 mcg (30 mg) (from potassium iodide 14,644 mcg, sodium iodide 14,644 mcg, molecular iodine [from kelp] 712 mcg)	20,000%
L-tyrosine 400 mg	**

**Daily Value (DV) not established.

Other Ingredients: microcrystalline cellulose, hydroxypropyl methylcellulose (vegetable cellulose capsule), silica.

Manufactured by a cGMP compliant facility exclusively for:
EuroMedica 955 Challenger Drive Green Bay, WI 54311

If your patients are looking to support healthy energy levels, immune function, or metabolism, Thyroid Care is the right choice. The ability of the thyroid to function effectively depends on many factors: age, the environment, and family history, just to name a few. For many of your patients, the iodine and L-tyrosine in Thyroid Care can make a dramatic difference, supporting thyroid function and healthy production of hormones for optimal health.*

Health Benefits:

- Healthy thyroid hormone balance^^
- Daily energy
- Mental focus
- Healthy metabolism
- Immune health
- Healthy weight management*††

What Makes Our Product Unique:

- Targeted support for a healthy thyroid gland with iodine and L-tyrosine—required by the thyroid to synthesize key hormones.*
- Iodine in three forms, including potassium iodide, sodium iodide, and molecular iodine for thyroid hormone synthesis.*
- L-tyrosine, also known as tyrosine, is an amino acid that is required to support the production of the thyroid hormone thyroxine.*

Frequently Asked Questions for Thyroid Care™*

Q. Why should I care about iodine?

A. Iodine is one of the most important minerals for healthy cellular and metabolic function. In fact, iodine is so important that it was put into table salt to help prevent goiters and iodine insufficiency. However, Americans are eating less refined table salt, and levels of iodine in other foods are diminishing with changes in soil and agricultural practices. There is less iodine in the American diet than there was just 50 years ago.*

Additionally, certain toxic minerals “compete” with iodine. As we are exposed to greater levels of chlorine, bromine (bromide) and fluoride, the body requires more iodine for ongoing detoxification.*

Q. What exactly is “tyrosine” or “L-tyrosine”?

A. Tyrosine is an amino acid. It is generally considered a “conditionally essential” amino acid because the body can typically synthesize adequate amounts of tyrosine from phenylalanine. However, in addition to thyroid hormone support, supplemental tyrosine has been found to be beneficial for mood, stress relief†, and mental function. Food sources include cheese, eggs, almonds, and avocados. Tyrosine, (also called “L-tyrosine”) is the precursor for the formation of the thyroid hormones thyroxine (T4) and triiodothyronine (T3), as well as epinephrine, norepinephrine and dopamine.*

What to Pair with Thyroid Care™*

Adrenaplex®	Helps support the adrenal gland with key nutrients essential for healthy adrenal gland function. This daily supplement helps support the body’s response to stress.**†
Essential Multivitamin	This complete multivitamin and mineral supplement delivers absorbable nutrients at meaningful levels that are appropriate for everyone, regardless of age or gender.

†Occasional stress.
