

ArthroMed™

Supports Joint and Spine Health, Flexibility and Comfort*

Contains Clinically Studied Curcumin and Boswellia

ArthroMed™ is a proprietary formula that effectively supports joint health and cartilage formation.*

- Supports healthy cartilage structure
- Optimizes comfort and mobility in articular joints and spine
- In a scientific study, Devil's Claw extract increased hyaluronic acid synthesis in chondrocytes by 41%; hyaluronic acid is critical for joint lubrication*

Recommendations:
1 to 2 capsules daily, or as recommended by your healthcare practitioner.
If pregnant or nursing, consult a healthcare practitioner before use.

ArthroMed™

Supports Joint and Spine Health,
Flexibility and Comfort*

CLINICALLY STUDIED
CURCUMIN
AND **BOSWELLIA**

60 Capsules

VEGAN NON-GMO DIETARY SUPPLEMENT

SUPPLEMENT FACTS

Serving Size: 2 Capsules
Servings Per Container: 30

Amount Per 2 Capsules (Veg):	%DV
Proprietary Complex	800 mg **
Containing Boswellia (<i>Boswellia serrata</i>) Gum Resin Extract (BOS-10®) standardized to contain ≥ 70% Total Organic and Boswellic Acids with AKBA ≥ 10%, with ≤ 5% beta-boswellic acids, Curcumin (<i>Curcuma longa</i>) Rhizome Extract (BCM-95®/Curcugreen®) enhanced with turmeric essential oil and standardized for curcuminoid complex (curcumin, demethoxycurcumin and bisdemethoxycurcumin), Devil's Claw (<i>Harpagophytum procumbens</i> , <i>Harpagophytum zeyheri</i>) Root Extract standardized to contain ≥ 20% harpagosides	

**Daily Value not established

Other Ingredients: hydroxypropyl methylcellulose (vegetable cellulose capsules), cellulose powder, silica, vegetable source magnesium stearate.

No sugar, salt, yeast, wheat, gluten, corn, soy, dairy products, artificial coloring, artificial flavoring, or artificial preservatives.

Manufactured by a cGMP compliant facility exclusively for:
EuroMedica 955 Challenger Drive Green Bay, WI 54311

ArthroMed is a proprietary formula that effectively supports joint health and cartilage formation. It safely modulates major signaling and biological pathways of the body that influence joint mobility and health.*

ArthroMed combines clinically tested boswellia extract and enhanced absorption curcumin along with Devil's Claw.

The Devil's Claw used in this formula is unlike most other products. It is standardized at 20% harpagosides – a key component for the best benefits – where most other products are either unstandardized or only standardized for 2% harpagosides.*

- Supports healthy cartilage structure
- Optimizes comfort and mobility in joints and back
- In a scientific study, Devil's Claw extract increased hyaluronic acid synthesis in chondrocytes by up to 41%, which can enhance joint lubrication[^]
- Clinically studied curcumin with turmeric essential oil is absorbed better than standard curcumin for amazing support*

Strong ingredients that make a difference:

- **Enhanced absorption curcumin** combines curcumin from turmeric (*Curcuma longa*) with turmeric essential oil (contains ar-turmerone) for excellent absorption. Comparison testing shows it has better absorption and enhanced blood retention time compared to standard curcumin extracts and/or turmeric.
- **Clinically studied boswellia** (*Boswellia serrata*) is uniquely standardized for 10 times the AKBA (acetyl-11-keto-beta-boswellic acid) of unstandardized boswellia and virtually no beta-boswellic acid.
- **Devil's Claw** (*Harpagophytum procumbens* and *zeyheri*) is native to southern Africa. Devil's Claw has been shown to increase hyaluronic acid synthesis in chondrocytes, which can improve joint lubrication, by up to 41%.*[^]

These ingredients work together to support healthy cartilage structure, comfort, and flexibility.*

Frequently Asked Questions for ArthroMed™:

Q. Can ArthroMed be taken with Curaphen®?

A. Yes, both **ArthroMed** and Curaphen can be used together. Curaphen is an excellent formula for providing immediate benefits, and **ArthroMed** can be used long-term for daily maintenance.

Q. Why is the boswellia in ArthroMed screened to reduce beta-boswellic acid?

A. While most boswellic acids are associated with positive benefits, beta-boswellic acid can interfere with the activity of AKBA.

Q. How does the enhanced absorption curcumin in ArthroMed compare to other curcumin and turmeric products?

A. The proper product comparison is curcumin to curcumin. However, since many companies are comparing their curcumin absorption to turmeric, we provide this information as a service to our customers.

- Plain curcumin compared to turmeric delivers up to 50 times the curcumin as the same amount of turmeric.
- This high-absorption curcumin delivers up to 10 times more curcumin into the bloodstream as the same amount of plain curcumin.
- Therefore, when compared **gram per gram**, this curcumin with turmeric essential oil delivers up to 500 times *more curcumin* than found in an equal amount of turmeric

What to pair with ArthroMed™:

- **Curaphen®** – Provides a combination of clinically studied curcumin blended with turmeric essential oil, boswellia, DLPA, and nattokinase for pain relief.*†

† Occasional muscle pain due to exercise or overuse
