People need effective immune system support every day. **Elderberry Immune Complex\*** can make all the difference. Elderberry Immune Complex\* provides key immune vitamins and minerals well known for their effectiveness, along with clinically studied Haschberg Austrian Elderberry, to support a healthy immune system.\*

**Elderberry Immune Complex\*** provides an immune blend for optimal benefits:\*

- Haschberg Austrian Elderberry (*Sambucus nigra*):** Clinically studied and standardized for anthocyanins, which support a strong immune response.\*
- Vitamin A as retinyl acetate:** For healthy immune system function, retinyl acetate is superior to beta-carotene.\*
- Vitamin C:** This essential nutrient is well known for immune benefits throughout the body.\*

- Vitamin D:** Research suggests that people with sufficient vitamin D levels have more robust immune systems.\*
- Vitamin E,** included in **Elderberry Immune Complex\*** with the full family of tocopherols, is a powerful nutrient for immune system support.\*
- Zinc:** Supports the immune activity of the thymus gland, the master gland of the immune system.\*
- Selenium** works with magnesium to keep the immune system healthy.\*

## Frequently Asked Questions for Elderberry Immune Complex\*:

### Q. Should I take Elderberry Immune Complex\* every day, or only for a limited time?

A. You can take **Elderberry Immune Complex\*** every day to support your immune system, or use for shorter periods of time when extra immune support is desired.\*

### Q. What are anthocyanins?

A. Anthocyanins are compounds (known as flavonoids) found in many fruits, vegetables, and other plants – especially those that are red, blue, or purple. In most cases, they are associated with the color of the fruit, but they also provide strong antioxidant protection for the fruit – and anyone who consumes it. Anthocyanins have been studied for their ability to support optimal health, including a healthy immune response.\*

### Q. Why do you use elderberry grown in Austria?

A. **Elderberry Immune Complex\*** features Austrian-grown elderberry because this variety produces a deep purple fruit that is especially abundant in anthocyanins. In fact, Austria is a center of elderberry production in Europe because of its combination of growing season, climate, and superior harvesting and processing techniques.

### Q. Why do you use the retinyl acetate form of vitamin A instead of beta-carotene?

A. The retinyl acetate form of vitamin A is used in **Elderberry Immune Complex\*** because it is the form proven to provide reliable immune support.\* While beta-carotene is a valuable nutrient, it is a “pro-vitamin A,” which means that while it *can* turn into vitamin A in the body, it doesn’t necessarily mean that it *will*.

### What to pair with Elderberry Immune Complex\*:

- **Sinutol Extra Strength** – Supports sinus cavities and soothes mucous membranes with a unique blend of eucalyptus, myrtle, plus the power of lemon extract.\*
- **Andrographis EP80™ Extra Strength** – An Ayurvedic botanical backed by science for immune, liver, and overall support.\*
