Product of Germany

It is estimated that almost 30 million Americans would benefit from support of healthy glucose levels. Many would like a safe, clinically tested, and effective option. **Sucontral D** provides it.

**Sucontral D** is the clinically studied formula powered by *Hintonia latiflora*, a botanical with a long history of traditional use. Scientists have discovered a unique compound in this plant that powerfully supports healthy blood sugar balance† and has been validated by over 60 years of German research. **Sucontral D** combines *Hintonia latiflora* with critical B vitamins, folic acid, vitamins C and E, and the trace minerals zinc and chromium – important nutrient cofactors for insulin function and healthy blood sugar metabolism. With decades of clinical research, **Sucontral D** is the superior choice for clinically studied glucose support.\*

- Backed by 60 years of research
- First time available in the U.S.
- From the makers of Traumaplant® Comfrey Cream

**Sucontral D** supports:

- Maintenance of healthy blood sugar levels throughout the day†
- Healthy insulin function
- Healthy A1C levels†
- Carbohydrate metabolism\*

#### Clinically Studied, Real Results!

Clinical research showed that with continued use, **Sucontral D** improved overall quality of life associated with blood sugar balance.\*†

## Frequently Asked Questions for Vitamin D3 Chewable:

### Q. Why not vitamin D2?

A. Vitamin D2, also known as “ergocalciferol,” is a common form of vitamin D that is less well-utilized because it must be converted to vitamin D3 by the body. Supplemental vitamin D3 typically shows much better use by the body than vitamin D2, because it doesn’t require this extra step.

### Q. Can’t I just get vitamin D from sunlight?

A. Even though our bodies do synthesize vitamin D3 following exposure to sunlight, most of us don’t spend enough time outdoors for this to happen regularly and for any sustained benefit. In fact, vitamin D3 levels are a major concern for individuals living in the northern latitudes, working indoors, or with darker skin. Having a reliable and convenient supplemental source of vitamin D3 simply ensures that you get the levels you need.

### Q. Can I give this to my kids?

A. No, **Vitamin D3 Chewable** provides an adult level of vitamin D, and is not intended for children.

### Q. What is the source of vitamin D3?

A. The source of vitamin D3 in this supplement is lanolin from sheep’s wool oil. The sheep are not harmed during the process, it is simply a product of the shearing and wool-production process.

### What to pair with Vitamin D3 Chewable:

- **CuraPro®** – Provides clinically studied, high-absorption curcumin, for strong antioxidant ability and healthy cellular support.\*
- **Andrographis EP80™ Extra Strength** – Delivers 80 mg of andrographolide, the key compound from this Ayurvedic answer for immune defense, cellular protection from oxidative stress, and healthy inflammation response.\*†
