

Berberine Ultra Absorption

Metabolic Support*

Berberine Made Better
Scientific studies show the absorption of standard berberine may only be 5%—or even less. For optimal metabolic support, we've combined our berberine with GammaSorb®, a unique delivery system that has been shown to increase the absorption of certain hard to absorb (fat soluble) dietary ingredients.*

Recommendations: 1 capsule daily, or as recommended by your healthcare practitioner.
If pregnant or nursing, consult a healthcare practitioner before use.

Berberine Made Better

Berberine has been recommended in traditional practice and recognized by modern science to support healthy blood sugar, cholesterol and triglyceride levels, and overall metabolic health.*[†] But despite these findings, standard berberine can still be difficult for the body to absorb and use effectively.

In fact, it's estimated that only about five percent of any given dosage of berberine actually makes it into the bloodstream, so finding a way to enhance absorption is key to the full advantage of its benefits.

Berberine Ultra Absorption can meet that challenge. Formulated with GammaSorb®, a plant-based material that has been shown to increase the absorption of certain hard to absorb (fat soluble) dietary ingredients.

Frequently Asked Questions for Berberine Ultra Absorption

Q. What is the source of your berberine

A. Although the compound berberine is found in many botanicals, the berberine in **Berberine Ultra Absorption** is an extract from Phellodendron (*Phellodendron amurense*) bark.

Q. Why does Berberine Ultra Absorption have less berberine per capsule than the Berberine 500 mg supplement?

A. The key to **Berberine Ultra Absorption** is in the specialized absorption delivery method that is part of the formula. Standard berberine can be difficult to absorb—that’s why you’ll see recommended dosages often start with a 500 mg dose and increase to a 1500 mg dose, or higher. We’ve paired berberine in **Berberine Ultra Absorption** with our GammaSorb® delivery system which has been shown to increase the absorption of certain hard to absorb (fat soluble) dietary ingredients.

What to Pair with Berberine Ultra Absorption

Nerve Complex™	Supports the delicate nerve endings in your feet, legs, and fingers.*
Sucontral® D	Features clinically studied <i>Hintonia latiflora</i> to support healthy blood sugar balance.*†
