

# Curaphen® Extra Strength

Professional Pain Formula<sup>\*†</sup>

Contains Clinically Studied Curcumin and Boswellia

For Extra Powerful Relief, **Curaphen® Extra Strength** is the Answer!<sup>\*†</sup>

**Curaphen Extra Strength** features higher levels of effective ingredients in a larger, more concentrated dosage form than regular strength Curaphen. Each ingredient addresses pain via a different clinical pathway, which results in significant pain relief.<sup>\*†</sup>

**Recommendations:** 1 tablet daily. May take 1 tablet three times daily, or as recommended by your healthcare practitioner. If pregnant or nursing, consult a healthcare practitioner before use.

†Occasional muscle pain due to exercise or overuse. All ingredients established in human studies for safety and effectiveness. Does not interfere with stomach, liver or kidney function.

## Clinically Studied Curcumin and Uniquely Standardized Boswellia

For Extra Powerful Relief, **Curaphen Extra Strength** is the Answer!<sup>\*†</sup>

When you need even stronger relief from occasional pain, **Curaphen Extra Strength** is the safe, effective choice.<sup>\*†</sup>

**Curaphen Extra Strength** provides higher levels of effective ingredients in a larger, more concentrated dosage form than regular strength Curaphen. Each ingredient addresses pain via a different clinical pathway, which results in significant pain relief.<sup>\*†</sup>

It provides the same strong ingredients found in Curaphen, but in a tablet that provides even more superior ingredients for award-winning pain relief in each convenient dose.<sup>\*†</sup>

It's everything you've come to love about Curaphen—with even more!

### Strong Ingredients!

**Curcumin** blended with turmeric essential oil containing ar-turmerone that has been clinically tested and shown in published studies to have **greater absorption and greater blood retention** time at significant levels than turmeric.

**Boswellia** that is clinically studied and uniquely standardized to provide more AKBA and virtually no beta-boswellic acid.

**DLPA** (DL-phenylalanine) has been shown to support healthy endorphin and enkephalin activity, the body's own powerful pain relievers.<sup>\*†</sup>

**Nattokinase** helps promote blood flow, aiding the other ingredients in Curaphen to reach all areas of the body.\*

### Need an Extra-Powerful Answer? Get Curaphen Extra Strength!

The curcumin featured in this formula has been proven in published clinical studies to provide consistent absorption and powerful benefits.

### Amazing Absorption!

You won't find another curcumin like the clinically studied form featured in **Curaphen Extra Strength!**

## Frequently Asked Questions for Curaphen® Extra Strength

---

### Q. Is it okay to take Curaphen Extra Strength and Curaphen at the same time?

A. You can take both of them at the same time, but you may want to start with **Curaphen Extra Strength** for initial intensive benefits, and then use Curaphen as a daily maintenance supplement.

### Q. What is the difference between Curaphen Extra Strength and the regular formula Curaphen?

A. **Curaphen Extra Strength** simply provides a higher level of ingredients in a different ratio and a more convenient dosage form. Just one or two tablets per day of **Curaphen Extra Strength** may be enough to provide the benefits people desire.

### Q. What makes the boswellia in Curaphen Extra Strength different than other boswellia extracts?

A. While most boswellic acids are associated with positive benefits, not all of them truly are best when you're trying to support an active lifestyle. By ensuring at least 10% or more acetyl-11-β-keto-boswellic acid (AKBA), and reducing beta-boswellic acid to less than 5%, the boswellia in **Curaphen Extra Strength** provides much greater benefit than most standard boswellic extracts, some of which have up to 15-25% beta-boswellic acid!

### Q. Does Nattokinase contain Vitamin K?

A. No. Nattokinase is an isolated and purified enzyme extract from natto (a fermented soybean food), which does not contain vitamin K.

### Q. Is there a difference between Curaphen Extra Strength and curcumin?

A. Yes. Curcumin is the beneficial compound found in the turmeric plant. **Curaphen Extra Strength** is the name of the product which contains our highly absorbable curcumin along with our uniquely standardized boswellia, DLPA and nattokinase.

### Q. Is there a difference between turmeric and curcumin?

A. Yes. Turmeric is the plant that provides curcumin. Turmeric typically contains about 2-5% curcumin, so taking an unstandardized, powdered turmeric product means that very large amounts would be required to get a beneficial amount of curcumin. Additionally, curcumin is poorly absorbed from the gastrointestinal tract. While turmeric is excellent when used as a spice, the high absorption curcumin extract used in **Curaphen Extra Strength** is a better choice for health benefits.

### Q. How does the curcumin in Curaphen Extra Strength compare to other curcumin and turmeric products?

A. The proper product comparison is curcumin to curcumin. However, since many companies are comparing their curcumin absorption to turmeric, we provide this information as a service to our practitioner partners and their patients.

- Plain curcumin 95% compared to turmeric delivers up to 50 times the curcumin as the same amount of turmeric.
- The curcumin in **Curaphen Extra Strength** has been proven to deliver up to 10 times more curcumin into the bloodstream as the same amount of plain curcumin.
- Therefore, when compared gram per gram, the curcumin in **Curaphen Extra Strength** is up to 10 times more curcumin than plain curcumin 95% and up to 500 times more curcumin than that found in an equal amount of turmeric.

### Q. Why is silica in this product?

A. Silica is just there to make sure that the premium ingredients in **Curaphen Extra Strength** are properly mixed and measured so that every capsule guarantees the same effective, beneficial components. Many botanical ingredients are, by their nature, "sticky" and can tend to clump if they are not mixed with a minute amount of inert, harmless material. We never use extra ingredients in any EuroMedica® product unless required for quality reasons.

## What to Pair with Curaphen® Extra Strength

---

### ArthroMed®

Supports joint health, plus flexibility and comfort with clinically studied curcumin, uniquely standardized boswellia, plus devil's claw.\*
