Thyroid Care™*

Supports Thyroid, Immune and Complete Metabolic Function*

Iodine with L-tyrosine

SUPPLEMENT FACTS

Serving Size: 2 Capsules
Servings Per Container: 30

Amount Per 2 Capsules (Veg):	%DV
Iodine	30,000 mcg (30 mg) 20,000%
(from potassium iodide 14,644 mcg, sodium iodide 14,644 mcg, molecular iodine [from kelp] 712 mcg)	
L-tyrosine	400 mg **

**Daily Value not established

Thyroid Care™* provides superior nutritional support for healthy thyroid and immune function. Optimal levels of iodine benefit the thyroid gland and enhance metabolism. L-tyrosine is an important amino acid which is absolutely necessary for the body to support healthy thyroid (as well as noradrenaline and dopamine) hormone production. It is impossible to have a well functioning thyroid without sufficient quantities of tyrosine combined with iodine, either in the diet, or through supplementation.*

Recommendations: 1-2 capsules daily on an empty stomach, or as recommended by your healthcare practitioner.

Do not use if trying to conceive, pregnant, or nursing.

Provides Iodine and L-tyrosine – nutrients that support a well-functioning thyroid*

Supports healthy metabolism, energy levels, and the immune system*

If you are looking to support energy levels, immune health, or metabolism, **Thyroid Care** is the right choice.*

Thyroid Care provides targeted support for a healthy thyroid gland, which is crucial for proper metabolism and immune system function. This formula provides iodine and L-tyrosine, which are required by the thyroid to synthesize key hormones.*

Optimal levels of iodine benefit the thyroid gland and enhance metabolism, and L-tyrosine plays an important role in the production of thyroid hormones as well. This important amino acid is absolutely necessary for the body to support healthy thyroid (as well as noradrenaline and dopamine) hormone production. In fact, it's impossible to have a well-functioning thyroid without sufficient quantities of L-tyrosine combined with iodine, either in the diet or through supplementation.*

Frequently Asked Questions for Thyroid Care™*

Q. Why should I care about iodine?

A. Iodine is one of the most important minerals for healthy cellular and metabolic function. In fact, iodine is so important that it was put into table salt to help prevent goiters and iodine insufficiency. However, Americans are eating less refined table salt, and levels of iodine in other foods are diminishing with changes in soil and agricultural practices. There is less iodine in the American diet than there was just 50 years ago.*

Additionally, certain toxic minerals “compete” with iodine. As we are exposed to greater levels of chlorine, bromine (bromide) and fluoride, the body requires more iodine for ongoing detoxification.*

Q. What exactly is “tyrosine” or “L-tyrosine”?

A. Tyrosine is an amino acid. It is generally considered a “conditionally essential” amino acid because the body can typically synthesize adequate amounts of tyrosine from phenylalanine. However, in addition to thyroid hormone support, supplemental tyrosine has been found to be beneficial for mood, stress relief[†], and mental function. Food sources include cheese, eggs, almonds, and avocados. Tyrosine, (also called “L-tyrosine”) is the precursor for the formation of the thyroid hormones thyroxine (T4) and triiodothyronine (T3), as well as epinephrine, norepinephrine and dopamine.*

What to Pair with Thyroid Care™*

Adrenaplex®	Helps support the adrenal gland with key nutrients essential for healthy adrenal gland function. This daily supplement helps support the body’s response to stress.* [†]
Essential Multivitamin	This complete multivitamin and mineral supplement delivers absorbable nutrients at meaningful levels that are appropriate for everyone, regardless of age or gender.*

[†]Occasional stress.
